Security Reasoning Protocol — Audit Report

Project	srp	Date	2026-03-22
Score	100/100 Security Score	Findings	0
High	0	Medium	0
Low	0	PoC Proven	0

Security Score = $100 - \sum(\text{severity weight} \times \text{proof multiplier})$ | High=25pts, Medium=10pts, Low=3pts | PROVEN finding doubles the deduction | Floor: 15

Severity ratings follow the Cyfrin CodeHawks Findings Severity framework.

Executive Summary

This report presents the findings of a comprehensive security audit of the SRP (Security Reasoning Protocol) smart contract system. The audit focused on critical vulnerability classes including reentrancy attacks, access control bypasses, economic invariant violations, and oracle manipulation vectors.
